Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-8, 11-17, 21-23, 34, 37, 38 and 47-49 are rejected under 35 U.S.C. 102(e) as being

anticipated by U.S. 6,423,776 (Akkapeddi et al).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Akkapeddi et al disclose oxygen scavenging high barrier polyamide compositions for packaging applications and shaped articles thereof comprising a) a polyamide blend of nylon 6 and nylon 6I/6T (EMS Grivory G21), b) an oxidizable epoxy functional polydiene (poly BD600) and c) a metal salt catalyst. Examples 16 and 17 are particularly noted.

Art Unit: 1711

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 20 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. 6,423,776 (Akkapeddi et al) described hereinabove.

It is reasonably believed that the polyamide composition of examples 15 and 16 of the reference inherently meet the conditions set forth in present claim 20 given the similarity in components and amounts thereof.

Claim Rejections - 35 USC § 103

5. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 6,423,776 (Akkapeddi et al) described hereinabove.

Although the preferred aliphatic nylon is nylon 6, other aliphatic polyamides such as nylon 6,6 can also be suitably used with the reasonable expectation of success.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ana L. Woodward whose telephone number is (703) 308-2401. The examiner can normally be reached on Monday-Friday (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James J. Seidleck can be reached on (703) 308-2462.
